

# Nova

## Mag-N

Quick-working source of nitrogen and magnesium for strong growth

11 | 0 | 0 | 9.6  
N | P | K | Mg

### Description

Nova Mag-N 11-0-0+15.4MgO is a quick-working source of nitrogen and magnesium, to help your plants with chlorophyll formation and photosynthesis, and to boost their growth. It's fully water-soluble and your crops will feel the benefit straight away: it's designed for fast and efficient uptake, with high purity levels. You can use Nova Mag-N is throughout the growth cycle to ensure good steady growth and an improved yield.

### Guaranteed analysis

#### Elemental

N	Total Nitrogen	11%
	Nitrate nitrogen (N-NO <sub>3</sub> )	11%
P	Phosphorus	0%
K	Potassium	0%

Mg	Magnesium	<b>9.6%</b>
	Water soluble (Mg)	9.6%

## Benefits

- Extremely efficient nitrogen and magnesium source
- Nutrients in a very quick-to-absorb form
- Easy to dissolve

## Application rates

Recommended dilution rate for stock solutions: 10-15 kg / 100 l water

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## How to use

- 1 We recommend applying Nova Mag-N at all growing stages of crops grown in both greenhouses and open fields.
- 2 On acid soils with a pH 7.4), excessive Ca has an overriding influence on Mg uptake by plants. In sandy soils, with low cation exchange capacity, Mg is readily leached.
- 3 Do NOT mix the product in the same tank with phosphorus-based products: extra caution is needed as precipitations may occur.
- 4 If you need more information, please contact your technical support.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
