# Description

Designed to improve the quality of soft irrigation water, Universol® Soft Water 113R contains NPK, Mg, Ca, and a full package of trace elements. Ideal for flowering crops and to harden off crops in their final growth phase, thanks to the high potassium-aimed N:K ratio of 1:3. This fast-acting product dissolves in a flash. And you are always guaranteed the same composition thanks to stringent quality control.

#### **Benefits**

N:K ratio of 1:3 boosts the quality of soft irrigation water, with all essential nutrients

Note: Dissolves quickly and acts rapidly

Nealthy growth thanks to continuous supply of calcium

### Characteristics

#### How to use

- This product is not recommended in hard water types, such as well water.
- Store under dry conditions.
- 3 Partly used or damaged bags should be closed well.
- To ensure that this product dissolves completely, prepare the stock solution 1-2 hours before use and stir well.
- Universol® Soft Water 113R can be mixed with calcium nitrate to create an N:K ratio of 1:1. Mix up to maximum 50:50%. Dissolve the Universol® before adding the CaNO3.
- Do not mix Universol® Soft Water 113R in the same tank with other Universol® products, other NPK fertilizers, or other sulfate or phosphate-containing fertilizers, except sulfuric or phosphoric acids.
- 7 If you need more information, please contact your technical support.

## **Application rates**

Please contact ICL for application rates specific to your situation. Recommended rates in g/L represents the dilution rate in irrigation water.

#### Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
