

Magrimax[®]

9S+27Mg

 The answer for magnesium deficiencies in your crop

9.2 | 27
S Mg

Description

Magrimax is a unique blend of immediately available and slow release magnesium. It contains magnesium sulphate and magnesium oxide which improves the balance and availability of higher calcium and potassium levels. Magrimax is particularly suitable for crops where magnesium deficiency is common. Use as an addition to an already existing full nutrition program, Magrimax can prevent magnesium deficiency for up to 12 months.

Guaranteed analysis

Elemental

N	Total Nitrogen	0%
P	Phosphorus	0%
K	Potassium	0%
Mg	Magnesium	27.0%
S	Sulphur	9.2%

Benefits

- Prevents magnesium deficiency for up to 12 months.
- Contains magnesium sulphate & magnesium oxide.
- Improves availability of higher Ca / K levels.
- Ideal for Mediterranean perennial plants, Camellia, Rhododendron and Citrus trees.
- Should be used in addition to a full nutrition program.

Application rates

Container grown cultures	
Potplants and Perennials	1.0 g/l
Container Nursery Stock	1.5 g/l
Fieldgrown cultures	
Trees & shrubs	3kg/100 m ² (or 70g/m ²)
Perennial beds	1kg/m ³ or (5g/l)

How to use

Magrimax is particularly suitable for: Mediterranean perennial plants, Camellia, Rhododendron and Citrus trees (where magnesium deficiency is common). Furthermore, Magrimax should be used as an addition to an already existing full nutrition program.

Everris | Magrimax Incorporate Magrimax into the potting soil.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
