

Sierrablen[®] Plus

Mini Hi K

 Sierrablen Mini 0-0-32.4 is the ideal controlled release Potassium fertilizer for hardening turf for the coming winter.

0		0		32.4	
N		P		K	

Description

Sierrablen Mini hardens the turf and makes the plant more resistant to various stresses including wear, drought and cold stress. It also works well as a base feed during the main growing season when supplemented with other controlled and conventional release fertilizers.

Guaranteed analysis

Elemental

N	Total Nitrogen	0%
P	Phosphorus	0%
K	Potassium	32.4%
	Water soluble (K)	32.4%

Benefits

 Controlled release fertilizer for hardening the turf for the coming winter

- \\ Hardens the turf and makes the plant more resistant to various stresses
- \\ Works well as a base feed during the main growing season when supplemented with other controlled and conventional release fertilizers

Characteristics

Longevity	3-4 Months
Granule size	1.0-2.5mm

How to use

- 1 Apply to dry foliage
- 2 Watering-in after application aids dispersion and gives a faster initial effect. Avoid applications during frosty or drought conditions
- 3 Applications should be made after aeration programmes, i.e. hollow tining, slitting and/or scarification in order to prevent granule damage

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
