### Elemental

N	Total Nitrogen	20%
	Ammoniacal nitrogen (N-NH <sub>4</sub> )	4.6%
	Urea nitrogen (N-Urea)	15.4%
P	Phosphorus	8.7%
	Water soluble (P)	6.5%
K	Potassium	6.6%
	Water soluble (K)	6.6%
S	Sulphur	8.4%

## Characteristics

Pack size	15kg
Pack coverage	420m <sup>2</sup>
Longevity	3 months
Turf response	7 days

## Description

If it's versatility you want, Landscaper Pro® New Grass works wonderfully for new lawns as much as existing ones. The nutrients – including 20% nitrogen and 20% phosphate – encourage young seedlings in new grass to grow rapidly into a well-balanced, dense sward. But it's also great for overseeding as the mini-granules ensure optimum nutrient distribution, and it doesn't damage vulnerable roots. Lasts for up to 3 months.

## Benefits

- \\ Ideal for over-seeding or laying new turf
- \\ Controlled release minimizes risk of burning young grass
- \\ Promotes dense sward and good root growth
- \\ Fine granule size ideal for even nutrient distribution

## How to use

- 1 Watering-in after application aids dispersion and gives a faster initial effect.
- 2 Avoid applications during frosty or drought conditions.
- 3 Only apply after aeration programs, i.e. hollow tinning, slitting, and/or scarification to prevent granule damage.
- 4 If you need more information, please contact your technical support.
