## K-Step

Your perfect autumn greens fertilizer

6 | 0 | 22.4 | 9.4 | 1.2 | 3.9 | TE  
N | P | K | S | Mg | Si | TE

## Guaranteed analysis

Elemental		
N	Total Nitrogen	6%
	Ammoniacal nitrogen (N-NH <sub>4</sub> )	0.8%
	Urea nitrogen (N-Urea)	0.2%
	Ureaformaldehyde (N-MU)	5%
P	Phosphorus	0%
K	Potassium	22.4%
	Water soluble (K)	22.4%
Mg	Magnesium	1.2%
Cu	Copper	0.030%
Fe	Iron	0.70%
Mn	Manganese	0.150%
Mo	Molybdenum	0.001%
Zn	Zinc	0.025%

## Characteristics

Pack size	20kg
Formulation type	Micro granule
Technology	Slow release
Granule size	0.7mm–1.4mm
	2–3 days
Granule dispersal	*depending on environmental factors
	6–8 weeks
Longevity	*depending on environmental factors
	7 days
Typical turf response	*depending on environmental

## Description

This is the one to reach for to condition your turf before it becomes stressed: it contains extra potassium, which will harden your grass. Ideal all year round, on all fine turf. These clever single-compound micro-granules contain standard-release and slow-release nitrogen and potassium, plus all essential trace elements. K-Step's low nitrogen content means compact growth and hardened turf, while its magnesium will boost color and hide the symptoms of stress. Features our famous patented MU2 and SilK technologies. Also helps with phosphorous build-up: there are no phosphates here.

## Benefits

- Low N & high K ratio for turf health during autumn and winter
- Compact growth, stronger grass, brighter color
- Sustained release for 6 – 8 weeks
- Even spread at low application rates
- Successfully used in many autumn ITM trials and programs to reduce disease occurrence

## How to use

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
