

# Nutrivant<sup>®</sup>

## Rice

 Growth-Stage Foliar Fertilizer

0 | 20.1 | 24.9 |

N

P

K

### Description

Nutrivant is fully chelated and balanced mix of micronutrients designed to improve crop quality and increase yield. Sugar Beets is recommended for root and tuber crops. Apply Nutrivant Sugar Beet at 6 leaves stage and reapply in 30 days for improved crop quality and yield.

### Guaranteed analysis

#### Elemental

N	Total Nitrogen	0%
P	Phosphorus	20.1%
	Water soluble (P)	20.1%
K	Potassium	24.9%
	Water soluble (K)	24.9%

Mg	Magnesium	<b>1.2%</b>
	Water soluble (Mg)	1.2%
B	Boron	<b>0.2%</b>
	Water soluble (B)	0.2%

## Benefits

- 100% assimilable nutrients ensuring total availability to the plant
- Long lasting penetration for improved foliar nutrition
- Higher and faster penetration of nutritional NPK elements of ionic, non-ionic fertilizers and micronutrients

## Application rates

1st spray in autumn, to improve tillering (3-4 leaves) and 2nd before heading (5-6 leaves)  
3-4kg/Ha

Minimum Avg	1kg/acre
-------------	----------

Maximum Avg	2kg/acre
-------------	----------

Dose your irrigation water with this solution, adjusting according to your crops' conductivity or ratio requirements. Trial first on a small scale before changing the rate, or any other variables, as circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results

## How to use

1 Add water to the fertilizer

2 spray on leaves

To be used for Foliar applications

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
