## Grapes

Flowering-Fruiting Stage

### Description

Nutrivant Plus Grape is a fully soluble foliar formulation enriched with magnesium and boron. Utilizing Fertivant technology for an advanced and persistent delivery system guarantees a homogenous distribution of microdrops across the leaves, enhances the permeability of the cuticle to active substances, and securely fixes the active ingredients to the leaf surface to delay evaporation. Apply Nutrivant Plus Grape to precisely meet the needs of grape vines, stimulating the accumulation of sugar in grapes and improving grape yield and wine quality.

### Benefits

- \\ Dependability
- \\ Chloride-free, high safety
- \\ Enriched with magnesium and boron
- \\ Fully soluble
- \\ Contains surfactant
- \\ Special formula to stimulate sugar accumulation in grapes
- \\ Improves the grape yield, and the quality of the wine
- \\ Made with clean materials
- \\ ICL's tight control of ingredients and manufacturing ensures consistent high quality

## How to use

To be used for Foliar applications

- 1 Add water to the fertilizer
- 2 Spray on leaves

## Application rates

Spray at a rate of 1‰ in 500-1000 liters/ha.

For increase yeild	For increase sugar content
1st spray after fruit setting	1st spray before bloom (at visible inflorescence
2nd spray: after 14 days	2nd spray: after 14 days

Dose your irrigation water with this solution, adjusting according to your crops’ conductivity or ratio requirements. Trial first on a small scale before changing the rate, or any other variables, as circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
