

Vitalnova®

SILK

 Foliar silica for healthy turf

0 | 3.0 | 10.0 |

N P K

Description

This advanced foliar feed contains silicon, which has been proven to help plants use water more efficiently, and which can assist with disease management, boosting grass health all round. It also contains plenty of potassium to ensure rich color and growth. We've left out the nitrogen here, so that it's better for turf that's under pressure from disease. Use throughout the growing season to support healthy plants. Add this to your program for optimal turf management.

Guaranteed analysis

Elemental

N	Total Nitrogen	0%
P	Phosphorus	3.0%
	Water soluble (P)	3.0%
K	Potassium	10.0%
	Water soluble (K)	10.0%

Benefits

- Contains silicon for better water use and healthier turf
- Ideal for disease management
- Potassium for improved growth and color

Characteristics

Pack size	10 litre
Formulation type	Liquid
Technology	Conventional
Longevity	3–4 weeks* depending on environmental factors
Typical turf response	Immediate* depending on environmental factors
Specific gravity	1.32

Application rates

Application rate	20 L/ha
Water volume	400–600 L/ha
Frequency	Monthly

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
