	Water soluble (Mo)	0.010%
Zn	Zinc	0.015%
	Water soluble (Zn)	0.015%
	Zinc EDTA (Zn)	0.015%

Description

If you irrigate with soft water, Peters[®] Excel CalMag Finisher is developed especially for you. It's the perfect step on from Peters[®] Excel CalMag Grower 15-5-15 to ensure your plants flourish, all from one tank. They'll be more compact thanks to the high potassium formula. And with plenty of chelated trace elements and a continuous supply of calcium and magnesium, they'll achieve perfect color and growth. The M-77 chelating complex ensures maximum availability and absorbability.

Benefits

- \\ All nutrient elements in a single storage tank, with calcium too
- \\ CalMag system, with its selected composition of raw materials and chelated trace elements
- \\ Especially formulated for soft water

Characteristics

How to use

- 1 You can mix this product in the same tank with calcium nitrate (50:50).
- 2 It's best to prepare your stock solution 1-2 hours before you use it, stir well, or use warm water to make sure that CalMag Finisher dissolves completely.
- 3 Do not mix Peters Excel with any other NPK or phosphate containing fertilizer, except phosphoric acid.
- 4 Close partly used or damaged bags securely.
- 5 Store under dry conditions.
- 6 If you need more information, please contact your technical support.

Application rates

Continuous feeding	Occasional feeding
0.5 – 1.5 g/liter	(e.g. 1 x week) 0.8 – 2 g/liter

Attention Trial first on a small scale before changing the rate, application or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilizers cannot be held responsible for any adverse results.
