	Water soluble (Mn)	0.06%
	Manganese EDTA (Mn)	0.06%
Mo	Molybdenum	0.006%
	Water soluble (Mo)	0.006%
Zn	Zinc	0.010%
	Water soluble (Zn)	0.010%
	Zinc EDTA (Zn)	0.010%

Description

When your crops yearn for a balanced, high-nitrogen, and high-phosphorus NPK nutritional formula, reach for Agrolution[®] Special 313 fertigation fertilizer. With this application, you can deliver all the nutrients your plants could ever need, while also improving overall nutrient availability. Due to its enhanced purity, solubility, and acidifying effect, you can protect your irrigation systems from harmful blockages and deposits. Prevent your plants from certain diseases thanks to its added levels of calcium, which also prolongs its overall shelf life.

Benefits

- Improves nutrient availability and uptake
- Protects irrigation systems from deposits and blockages
- Comes complete with full trace element package

How to use

- 1 The Agrolution® range offers a wide range of analyses covering all crop growth stages while providing tailored assistance to specific soil and water types.
- 2 Store under dry conditions.
- 3 Properly seal partly used or damaged bags.
- 4 For tailored advice, contact your ICL advisor and ask for information specific to Agrolution® Special.

Application rates

The average recommended application rate is 40-50 kg/ha per week.

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
