

Max 44-0-0

Optimise your NUE with Agrocote® Max

44 | 0 | 0 |
N P₂O₅ K₂O

Description

Satisfy your crops' nitrogen requirements with Agrocote® Max 44-0-0 | 1-2M. With just one simple application prior to planting or seeding you can easily meet the high nitrogen needs of your short-medium cycle crops, such as brassicas, potatoes, and leafy vegetables. Agrocote Max is especially suitable in light soils where N is prone to losses via leaching. Thanks to ICL's state of the art patented E-Max Release Technology, your plants will enjoy a sustained, controlled, and reliable release of nitrogen over a guaranteed time period, based on an average soil temperatures.

Guaranteed analysis

Oxide

N	Total Nitrogen	44%
	Urea nitrogen (N-Urea)	44%
P ₂ O ₅	Phosphorus Pentoxide	0%
K ₂ O	Potassium Oxide	0%

Benefits

- Reduced nutrient losses via leaching, volatilization, and denitrification
- Increases crop yield or maintains it in case of lower nutrient application rate
- Enhanced nitrogen use efficiency

Application rates

Crop	Rates
Potato (including seed potatoes):	150-400 kg/ha
Fruits and open field vegetables:	150-400 kg/ha

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Suitable for short-medium crop cycles.

How to use

- 1 Apply by row application or broadcasting.
- 2 Do not apply more than 1-2 weeks prior to planting.
- 3 Incorporate into the soil at a depth of between 5-10 cm.
- 4 Place the product under drippers where applicable.
- 5 Improve product and plant performance by irrigating after planting/seeding.
- 6 Reduce the dosage if WSFs are used in the second part of the crop cycle.
- 7 Properly seal partly used or damaged bags.
- 8 Store under dry conditions.
