

ICL**PKPLUS**®

High P PK

Five essential nutrients in one application with extra phosphorus

Description

PKpluS® High P is an advanced granular fertiliser that features our Polysulphate® technology, providing a continuous source of sulphur throughout the crop cycle, and a minimised risk of leaching. This blend is perfect if your soil is low in phosphorus: it will ensure your plants can establish themselves well and grow strong. It contains phosphorus, sulphur, potassium, magnesium, and calcium, so your crops have all the nutrients they need in one application with this five-in-one feast.

Representative Formulas

	P₂O₅	K₂O	MgO	SO₃	CaO
29-5 (PhosphatepluS)	29	5	2	18	21
18-18	18	18	6	18	15
20-20	20	20	2	15	17

Benefits

- \\ A high-phosphorus blend combined with our Polysulphate® technology
- \\ Phosphorus, potassium, sulphur, magnesium, and calcium all rolled into one
- \\ Great plant establishment, and useful with soils with low phosphorus levels

Application rates

Trail first on a small scale before changing the rate, or any other variables,
As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Information on spreader settings for this product is available [here](#)

How to use

- 1 Apply directly to fields, orchards, and plantations. When bulk blending, this product can be combined with nitrogen (N) fertilisers.
- 2 If you need more information, please contact your technical support.
- 3 Store under dry conditions.
- 4 Properly seal partly used or damaged bags.

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
