	Water soluble (CaO)	8%
MgO	Magnesium Oxide	2.8%
	Water soluble (MgO)	2.8%
SO ₃	Sulphur trioxide	23%
	Water soluble (SO ₃)	23%

Description

ICL Potashplus™ is a granular fertiliser specially formulated using a combination of potash (MOP) and Polysulphate. Potashplus is a potassium and sulphate fertiliser that also contains magnesium and calcium. Potashplus supplies your crop with four essential nutrients in one single fertiliser application and inside each granule. The product can be spread accurately up to 36m with a uniform distribution of nutrients across the field to save time and cost. As a spring potash source, Potashplus has the added benefit and value of providing magnesium for better photosynthesis, calcium for strong and high quality crops, and sulphur for optimum protein and oil formation.

Benefits

- Our Polysulphate® technology combined with the ever-popular potash
- Potassium, sulphur, magnesium and calcium all rolled into one
- Bigger, better yield

How to use

- 1 Apply directly to fields, orchards, and plantations. When bulk blending, this product can be combined with all other fertilisers.
- 2 Properly seal partly used or damaged bags.
- 3 Store under dry conditions.
- 4 If you need more information, please contact your technical support.

Application rates

Trail first on a small scale before changing the rate, or any other variables,

As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
