

Vitalnova®

TriBoost

 A growing media incorporated biostimulant which boosts plant health

Description

Vitalnova TriBoost is the new microbial inoculant which consists of enzymes three beneficial live cultures; *Bacillus subtilis*, *Enterococcus faecium* and *Lactobacillus plantarum*. Each microbial strain has been selected for their beneficial properties with regards to soil health.

Benefits of Microbes

Robust communities of beneficial soil microbes are essential to soil productivity, substantially reducing or eliminating viable pathogens and weed seeds, rapidly breaking down plant residues, improving soil carbon and pH, and providing plants with available nutrients throughout the growing season. A diverse, healthy soil agrobiome leads to improved plant vitality and increased yields.

Vitalnova TriBoost has live microbial strains and enzymes selected for their role in healthy soils

They break down organic molecules from substrate or organic fertilisers

Improving soil carbon and pH and promotes a healthy soil

Plants thrive in a balanced soil with a robust population of beneficial microbes

Application rates

Growing media incorporation. Mix 500g per 1m³ of growing media.
