

Fibagro[®]
Advance

Fibagro Advance

The substrate for peat free & peat reduced growing media

Description

Fibagro Advance is a perfect base for peat free growing media as well as complementing peat for peat reduced plant production. Manufactured from FSC certified raw materials, Fibagro Advance is created from wood chips which are thermo-mechanically processed. During this process the wood chips are put through extremely high temperatures allowing unwanted substances to escape as gas, ensuring that Fibagro Advance is free of any kind of chemical or physical additive and is sterile.

Benefits

- \\ Reduced leaching
- \\ High Air Filled Porosity for good rooting and drainage
- \\ Improved Water Holding capacity making it easier to manage plants throughout
- \\ Great structure that doesn't allow mixes to 'slump' in the pots
- \\ Has a stable nitrogen profile
- \\ Fully sterilised - heat treated
- \\ Manufactured from UK FSC certified and sustainable raw materials
- \\ Combined with the strong nutrition packages of ICL, Fibagro Advance can be used in high percentages in mixes providing a robust and cost efficient diluent of peat.
