

# Agrocote®

## Max 44-0-0

 The pure technology product

44 | 0 | 0 |  
N P<sub>2</sub>O<sub>5</sub> K<sub>2</sub>O

### Description

Provide crops with all of their nitrogen requirements with Agrocote® Max 44-0-0 | 2-3M. One single application in lighter soil conditions, prior to planting or seeding, is enough to fulfil the substantial nitrogen requirements of potatoes and other medium-late cycle field soil-grown vegetables. ICL's state of the art patented E-Max Release Technology benefits crops through controlled, reliable, and sustained high-quality nitrogen release.

### Guaranteed analysis

#### Oxide

N	Total Nitrogen	44%
	Urea nitrogen (N-Urea)	44%
P <sub>2</sub> O <sub>5</sub>	Phosphorus Pentoxide	0%
K <sub>2</sub> O	Potassium Oxide	0%

## Benefits

- \\ One single base fertiliser supplying the entire N requirements
- \\ Increases crop yield or maintains it in case of lower nutrient application rate
- \\ Enhanced nitrogen use efficiency
- \\ Proven performance in potatoes, vegetables and fruits
- \\ Especially in light soils where N is prone to losses via leaching

## How to use

- 1 Apply by row application or broadcasting.
- 2 Do not apply more than 1-2 weeks prior to planting.
- 3 Incorporate into the soil at a depth of between 5-10 cm.
- 4 Place the product under drippers where applicable.
- 5 Improve product and plant performance by irrigating after planting/seeding.
- 6 Reduce the dosage if WSFs are used in the second part of the crop cycle.
- 7 Properly seal partly used or damaged bags.
- 8 Store under dry conditions.
- 9 If you need more information, please contact your technical support.

## Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
