Description

Peters® Excel Hard Water Finisher is ideal for plants in hard water settings, especially high nitrogen areas. N:K ratio is 1:2. It lowers EC, neutralises bicarbonates, enhancing water quality. Chelated trace elements promote vivid ornamental colors. HCO₃-buffering stabilises soil pH. M-77 complex boosts nutrient availability.

Benefits

- Perfect for controlled, compact, beautiful growth in hard-water conditions
- Protects drippers and irrigation systems from limescale blockages
- Improved water quality, especially with high nitrogen levels

Application rates

Continuous feeding

0.5 – 1.5 g/liter

Occasional feeding

(for example, once a week) 0.8 – 2 g/liter

Attention Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilisers cannot be held responsible for any adverse results.

How to use

- 1 It's best to prepare your stock solution 1-2 hours before use, stir well or use warm water to make sure that Peters® Excel Hard Water Finisher dissolves completely.
- 2 Do not mix Peters® Excel with any other NPK or phosphate containing fertilizer, except phosphoric acid.
- 3 Make sure you close partly used or damaged bags securely.
- 4 Store under dry conditions.
- 5 If you need more information, please contact your technical support.
