Description

When your vegetable, fruit, and arable crops demand a high-potassium, low-phosphorus nutrient-rich kick, look no further than Agrolution[®] Special 324 fertigation fertiliser. This water-soluble application is designed to help you optimise your plants' nutrient availability and intake. Pre-empt any blockages or deposits within your soft-water irrigation systems thanks to its high levels of purity, solubility, and acidifying effect. Its added calcium means you can prevent diseases such as blossom end rot, while also prolonging the product's shelf life.
