## Description

When you need a high-potassium, low-phosphorus nutrient boost for your crops, look no further than Agrolution® Special 214 fertigation fertiliser. Optimise your plants' nutrition and nutrient availability with this water-soluble, acidifying application, complete with full trace element package. Made from the purest of ingredients and designed for hard water environments, its high solubility will spare you from any blockages incurred through spraying applications. Its added calcium helps protect against certain plant diseases and prolongs the product's overall shelf life.
