Benefits

Remedies nitrogen, phosphorus, and potassium shortages

Promotes clean irrigation systems

 Improves nutrient availability

Application rates

The average recommended application rate is 40-50 kg/ha per week.

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

- 1 The Agrolution® range offers a wide range of analyses covering all crop growth stages while providing tailored assistance to specific soil and water types.
- 2 Store under dry conditions.
- 3 Properly seal partly used or damaged bags.
- 4 For specific recommendations, please ask for individual Agrolution® technical product information or contact your ICL advisor.
