

# H2Pro®

## Tablet

A hose-end applied wetting agent for efficient hand watering.

## Description

H2Pro Tablet is a convenient hose-end applied wetting agent in tablet form which combats localized dry patches effectively and for helping to reduce overall irrigation requirement.

## Benefits

- \\ Effective rewetting through the rootzone
- \\ Excellent water spreading and penetration characteristics
- \\ For spot-treating problem areas and to complement a main wetting agent programme

## How to use

- 1 Apply H2Pro tablets in combination with a full wetting agent program to spot-treat hydrophobic areas. Dispense using a H2Pro Applicator.
- 2 Water-in following application to improve efficacy and assist wetting agent soil penetration. Enhance wetting agent penetration by applying after aeration programs, such as hollow tining, slitting, or scarification.

## Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

## Characteristics

Formulation type	Soluble tablet
Technology	Surfactant
Pack size	6 x 500m2
	2-4 weeks*
Longevity	depending on environmental factors
Type	Spot treatment

## Application rates

Applicator	Product	Spray time (minutes)	Area treated (m2)
H2Pro Pellet Pro Gun	1 x 250g tablet	5 -10	250 - 500

One tablet will treat 6 – 7 average-sized golf greens. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
