

H2Pro[®]

AquaSmart

A cost-effective wetting and water conservation agent

Description

H2Pro AquaSmart is an outfield wetting agent for a low rate application to provide a cost-effective programme. The agent for low rate application provides a greater water-use efficiency by slowing drying and then allowing quick rewetting of the soil, so maintaining a healthy plant and a quality surface.

Benefits

- Improves water efficiency for outfield areas
- Helps reduce incidence of Dry Patch
- Protects turf quality through periods of dry conditions
- Flexible application rates

Characteristics

Formulation	Liquid
Technology	Surfactant
Pack size	5 litre & 120 litre
Longevity	4–6 weeks* depending on environmental factors

Application rates

Application rate	5–10 L/ha
Water volume	400–800 L/ha
Frequency	Every 4–6 weeks

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
