

## Mag-N

Readily available source of nitrogen and magnesium for strong growth

11 | 0 | 0 | 9.6  
N | P | K | Mg

## Guaranteed analysis

Elemental		
N	Total Nitrogen	11%
	Nitrate nitrogen (N-NO <sub>3</sub> )	11.0%
P	Phosphorus	0%
K	Potassium	0%
Mg	Magnesium	9.6%
	Water soluble (Mg)	9.6%

## Description

Nova Mag-N 11-0-0+15.4MgO is ICL SF's magnesium nitrate fertiliser with fully soluble and very pure nutrients that dissolve quickly in water. It contains important nutrients for plant growth; nitrate nitrogen which is immediately available to the plants, and magnesium which is important for photosynthesis. Magnesium is one of the nutrients with high mobility in the plant and should be applied continuously throughout the entire growth period. Typical deficiency symptoms will first appear on old leaves. Magnesium, along with calcium and sulphur, is a key component in plant nutrition, that can directly affect plant growth and thus yield.

## Benefits

- \\ Extremely efficient nitrogen and magnesium source
- \\ Nutrients in a very quick-to-absorb form
- \\ Easy to dissolve

## How to use

- 1 We recommend applying Nova Mag-N at all growing stages of crops grown in both greenhouses and open fields.
- 2 Do NOT mix the product in the same tank with phosphorus-based products: extra caution is needed as precipitations may occur.
- 3 If you need more information, please contact your technical support.

## Application rates

---

Recommended dilution rate for stock solutions: 10-15 kg / 100 l water

Trial first on small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
