	Water soluble (P)	0%
K	Potassium	0%
	Water soluble (K)	0%

Description

ICL's Fine Potash is a high-quality, extremely pure potassium source ideal for fertiliser production. This premium material is ideal for NPK granulation, SOP/NOP production, and the manufacture of water-soluble fertilisers and liquid solutions. ICL potash is from natural sources. Our unique Dead Sea production site uses a natural evaporation process resulting in potash with a significantly lower carbon footprint when compared to alternative products.

Benefits

- \\ Ideal raw material for fertiliser production
- \\ Suitable for NPK granulation, SOP production, and liquid solutions
- \\ Premium product with a very high potassium content: 62% K₂O
- \\ High solubility due to its purity, fine texture, and lack of anti-caking agents

How to use

- 1 Suitable for producing fertiliser. Compatible with all modern mechanical spreaders, producing easy and uniform distribution in the field.
- 2 If you need more information, please contact your technical support.

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
