## Description

Help your forestry and orchard crops branch out with Agroblen® 9-20-8+3MgO+0.1B | 8-9M. This high-phosphorus fully coated NPK fertiliser is enriched with boron and magnesium, providing your plants with uniform growth and stronger roots. Designed specifically for planting application, this product is a perfect solution for establishing forestry, such as conifers or Eucalyptus, and orchard crops. Enjoy controlled, sustained, and reliable nutrition thanks to ICL's state of the art Resin Release Technology, providing high-quality nutrients over a guaranteed 8-9 month period, at average soil temperature of 21C.

## Benefits

- \\ NPK ratio suited to forestry and orchard crops
- \\ High phosphorus ideal for establishing new plantations
- \\ Can be applied in planting holes just before planting
- \\ Environmentally friendly due to minimised nutrient losses

## How to use

- 1 Apply via planting hole method.
- 2 You can also use row, spots, or broadcasting application methods.
- 3 Do not apply more than 1-2 weeks before planting.
- 4 Incorporate into the soil at a depth of between 5-10 cm.
- 5 Place the product under drippers where applicable.
- 6 Improve product and plant performance by irrigating after application.
- 7 Reduce the applied dosage if WSFs are used in the second part of the crop cycle.
- 8 Store under dry conditions.
- 9 Properly seal partly used or damaged bags.
- 10 If you need more information, please contact your technical support.
