	Water soluble (K)	0%

Description

Standard Potash from ICL is a premium, high-quality concentrated potassium source suitable for direct application and for fertiliser production. It is the most concentrated and economical potassium source, making it the potassium fertiliser of choice in most situations. ICL potash is from natural sources. Our Dead Sea production site uses a natural evaporation process resulting in potash with a significantly lower carbon footprint when compared to alternative products.

Benefits

- Great for direct application in fields, orchards, and plantations or bulk blending with other fertilisers
- Increases crop yield and quality, disease resistance, and drought tolerance
- Enhances fruit firmness, texture, flavor, size, and color and increases oil content of oil crops

How to use

- 1 Suitable for producing fertiliser.
- 2 Compatible with all modern mechanical spreaders, producing easy and uniform distribution in the field.
- 3 If you need more information, please contact your technical support.

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
