

ICL PhosphatepluS®

Give your crops the power of phosphate

Description

ICL PhosphatepluS is a high quality granular fertiliser combining the benefits of triplesuperphosphate (GTSP) and Polysulphate into a single granule. PhosphatepluS supplies your crop with five essential nutrients in every granule, helping to increase the efficiency of your phosphate application and boost crop establishment and root growth. PhosphatepluS is a highly effective starter fertiliser that is suitable to be used in direct drilling or can spread up to 36 metres. Trials show that applying some potash, sulphur calcium and magnesium together with phosphate at planting, increases nutrient uptake and establishment.

Benefits

- \\ Ideal product for direct drilling
- \\ Boost establishment by stimulating root development and germination
- \\ Combined benefits of GTSP and Polysulphate in a single granule
- \\ Prolonged nutrient release to improve NUE and reduce leaching

How to use

If you need more information, please contact your technical support.
