Description

The finer granules of Osmocote® Exact Mini 5-6M make it perfect for smaller pots. Just mix the granules in or apply by topdressing once the roots have developed, and the nutrients will be steadily released. Ideal for small substrate volumes from 20 ml, so it is perfect for plugs and trays with small compartments – or any pot smaller than 8 cm in diameter. 100% coated & 100% safe for plants.

****Recommended application rates for Osmocote® Exact Mini granules in g/l**** Attention The recommended rates above are based on unfertilized substrates. Adjust the pH level according to crop requirements. These are general recommendations. Adjust for specific situations, such as use in tunnels or greenhouses, or specific climate conditions. Not recommended for dibbling and/or autumn/winter pottings. Contact your ICL Specialty Fertilizers advisor for more detailed advice. Trial first on a small scale before changing the rate, application or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilizers cannot be held responsible for any adverse results.
