Description

Give you container nursery stock some top-shelf nutrient content with OsmoTop® 2-3M. Apply this coated topdressing fertiliser to provide an immediate greening effect, correct any potential plant deficiency symptoms, and guarantee a controlled steady supply of nitrogen. While you should ideally apply it onto well-rooted pot plants, the product will securely stick to the growing media surface.

Benefits

- \\ Fine granules for even container distribution
- \\ Dust-free
- \\ Pre-defined 2-3 month longevity period

How to use

- 1 Use OsmoTop® 2-3M especially for container nursery stock topdress application.
- 2 Topdress over containers for fast greening effect or quick deficiency symptom correction.
- 3 You can topdress when using overhead or drip irrigation. For drip irrigation, apply the product directly under the drippers.
- 4 You can apply the product together with recommended ICL topdress applicators.
- 5 Properly seal partly used or damaged bags.
- 6 Store under dry conditions.

Application rates

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
