	Water soluble (Fe)	0.16%
	Iron EDTA (Fe)	0.16%
Mn	Manganese	0.06%
	Water soluble (Mn)	0.06%
	Manganese EDTA (Mn)	0.06%
Mo	Molybdenum	0.006%
	Water soluble (Mo)	0.006%
Zn	Zinc	0.010%
	Water soluble (Zn)	0.010%
	Zinc EDTA (Zn)	0.010%

Description

When you need a high-potassium, low-phosphorus nutrient boost for your crops, look no further than Agrolution[®] Special 214 fertigation fertiliser. Optimise your plants' nutrition and nutrient availability with this water-soluble, acidifying application, complete with full trace element package. Made from the purest of ingredients and designed for hard water environments, its high solubility will spare you from any blockages incurred through spraying applications. Its added calcium helps protect against certain plant diseases and prolongs the product's overall shelf life.

Benefits

- Delivers all required plant nutrients
- Enhances nutrient availability
- Remedies calcium deficiencies

Characteristics

How to use

- 1 The Agrolution® range offers a wide range of analyses covering all crop growth stages while providing tailored assistance to specific soil and water types.
- 2 Store under dry conditions.
- 3 Properly seal partly used or damaged bags.
- 4 For tailored advice, contact your ICL advisor and ask for information specific to Agrolution® Special.

Application rates

The average recommended application rate is 40-50 kg/ha per week.

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
