Description

Solinure® 9 High P fertigation fertiliser is a high-phosphorus NPK formula designed to specifically fulfil plants' unique nutrient requirements. This makes it a perfect money-saving solution whilst still providing optimum plant nourishment. Enhance overall crop performance due to its added magnesium and comprehensive trace element package.

Benefits

- Boosts vegetative growth
- Completely chloride-free
- Contains added magnesium and full trace element package

Characteristics

How to use

- 1 Use Solinure® 9 High P during early stages of root system development, along with during flowering.
- 2 Store under dry conditions.
- 3 Make sure you properly seal partly used or damaged bags.
- 4 For specific advice and recommendations, contact ICL or your professional advisor.

Application rates

Application rate: 40-60 kg/ha per week.

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Please contact your ICL Technical Area Sales Manager for more detailed advice.
