

Hi Peak

The highest phosphorus and potassium concentration available

0 | 44 | 44
N P₂O₅ K₂O

Guaranteed analysis

oxide		
N		
P ₂ O ₅	Phosphorus Pentoxide	44%
	Water soluble (P ₂ O ₅)	44%
K ₂ O	Potassium Oxide	44%
	Water Soluble (K ₂ O)	44%

Description

Hi Peak has the highest (88%) concentration of Phosphorus and Potassium available in the market. With a balanced ratio of fully soluble P&K, it ensures maximum availability of nutrients to the plants. Hi Peak is a low salt-index fertilizer recommended on a wide variety of crops in its growth and developmental stages. Hi Peak is a pure, 100% water soluble fertilizer with no chloride or impurities.

Benefits

- \\ Free of chloride and impurities, with a low salt index
- \\ The most concentrated (88%) P and K fertilizer in the market
- \\ Crystalline, dust-free physical form keeps the fertilizer free-flowing
- \\ Quick and excellent dissolution in water in the field, even at low temperatures
- \\ With a solubility of 680 g/L, Hi Peak® is more soluble than MKP and P&N products
- \\ Safe to use, and non-hazardous

How to use

- 1 Flexible for use in hydroponics, where it can easily be matched to the plants' nutrient needs
- 2 Hi Peak®'s neutral pH of 7 makes it suitable for use as a soil and foliar fertilizer. It's not phytotoxic and is safe for crops
- 3 Nitrogen-free, allowing full and independent control over the nitrogen in the fertigation program
- 4 If you need more information, please contact your local ICL support

Application rates

Recommended dilution rate, for stock solutions: 10-15 kg/100L

Minimum Average	10kg/acre
Maximum Average	20kg/acre

It is advised to adjust the application rates beyond the suggested limit as per the crop's status and nutrient requirement. It is recommended to undertake a trial on a small scale before changing the application rate or any other variables, as circumstances can differ. As the recommended application rate might be beyond our control, hence, ICL cannot be held responsible for any adverse results.

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
