Description

Fertiflow Tomato-II 13-05-37+3CaO is an essential fertilizer for safeguarding the later stages of tomato plantations. It has added Calcium in the mix which is one of the important secondary macronutrients required by tomato plants. It provides the planation with a steady supply of nutrients to ensure a higher ratio of tomato production per plant.

Benefits

- \\ Fertilizer specially developed for Tomato and other crops with multiple picking
- \\ Plenty of flowers and fruits
- \\ Reduces flower drop
- \\ Quality produce in terms of fruit shape, color and weight

How to use

- 1 Apply directly to acidic soils with low pH, and/or tropical and subtropical soils.
- 2 Recommended for fertigated crops.
- 3 Store under dry conditions. Properly seal partly used or damaged bags.

Application rates

Minimum Average	10kg/acre
Maximum Average	20kg/acre

It is advised to adjust the application rates beyond the suggested limit as per the crop’s status and nutrient requirement. It is recommended to undertake a trial on a small scale before changing the application rate or any other variables, as circumstances can differ. As the recommended application rate might be beyond our control, hence, ICL cannot be held responsible for any adverse results.

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
