

FertiFlow®

12-6-22+12CaO

A fine balance of NPK fertilizer with the added strength of Calcium

12 | 6.0 | 22.0 | 12.0
N P₂O₅ K₂O CaO

Guaranteed analysis

Oxide		
N	Total Nitrogen	12%
	Nitrate nitrogen (N-NO ₃)	12.0%
P ₂ O ₅	Phosphorus Pentoxide	6.0%
	Water soluble (P ₂ O ₅)	6.0%
K ₂ O	Potassium Oxide	22.0%
	Water Soluble (K ₂ O)	22.0%
CaO	Calcium Oxide	12.0%
	Water soluble (CaO)	12.0%

Description

FertiFlow 12-6-22+12CaO is a NPK Fertilizer with added calcium, which is essential for crops in their early stages. Calcium is one of the secondary macronutrients and it promotes proper elongation of plant cells and also strengthens the cell wall structure. Though required in smaller quantities, Calcium is crucial for growth of the plants and makes them less susceptible to weather, diseases and pests.

Benefits

- Useful in early establishment, development and prematurity growth stages
- Maintains the crop growth and vigour of the crop
- Reduces any calcium deficiency, helps improve growth & yield
- Suitable mostly for alkaline soils due to low pH (3.7)
- Adds resistance against all types of weather fluctuations, pests and diseases

How to use

- 1 Apply especially to fertigated crops
- 2 Store under dry conditions. Properly seal partly used or damaged bags

Application rates

Minimum Average	15kg/acre
Maximum Average	25kg/acre

It is advised to adjust the application rates beyond the suggested limit as per the crop's status and nutrient requirement. It is recommended to undertake a trial on a small scale before changing the application rate or any other variables, as circumstances can differ. As the recommended application rate might be beyond our control, hence, ICL cannot be held responsible for any adverse results.

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
