

BIOZ

BIOZ Diamond 10-0-1

Discover your crops' maximum potential with BIOZ Diamond biostimulant

Description

BIOZ Diamond 10-0-1 biostimulant increases nutrient use efficiency and crop productivity. This powerful fulvic acid and yeast extract also contains carbon and nitrogen fertilizer. BIOZ Diamond 10-0-1 is a proven solution for improving early-season growth and nutrient acquisition, leading to increased crop yields.

Benefits

- Greater soil nutrient use efficiency
- Plant biostimulation promoting better development
- Easy to apply
- High concentration of fulvic acid
- Improves starter fertilizer yield responses

Application rates

For all crops, apply BIOZ Diamond 10-0-1 at a minimum rate of 32 fluid ounces per acre. Multiple applications may be needed for uses like fertigation.

How to use

Although BIOZ Diamond 10-0-1 may be used alone, the greatest benefit from this product is expected when combined with an additional source of nutrients (starter fertilizer blends; broadcast soil treatments of liquid fertilizers) or as a component of a complete fertigation program for irrigated crops.

BIOZ Diamond is compatible with most liquid fertilizer blends, including acid-forming water-soluble fertilizers like Nova PeKacid and Agrolution pHLow. A jar test should be performed in advance of field application to ensure compatibility using the same relative proportions of nutrient sources and BIOZ Diamond to be applied.

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
