

Agrolution[®] pHLow

Agrolution pHLow High NK 20-10-20 with micros
A root zone fertilizer with a one-to-one ratio of nitrogen and potassium and reduced phosphorus, ideal for use in cold soils

20 | 10 | 20
N P₂O₅ K₂O

Guaranteed analysis

N	Total Nitrogen	20%
	Nitrate nitrogen (N-NO ₃)	12.3%
	Ammoniacal nitrogen (N-NH ₄)	7.7%
P ₂ O ₅	Phosphorus Pentoxide	10%
K ₂ O	Potassium Oxide	20%
B	Boron	.02%
Cu	Copper	.05%
	Copper EDTA (Cu)	.05%
Fe	Iron	.1%
	Iron EDTA (Fe)	.1%
Mn	Manganese	.05%
	Manganese EDTA (Mn)	.05%
Mo	Molybdenum	.0005%
Zn	Zinc	.05%
	Zinc EDTA (Zn)	.05%

Description

Agrolution pHLow High NK 20-10-20 with micros is a high NK water-soluble fertigation fertilizer ideal for general crop nutrition when lower phosphorus is desired. It provides complete crop nutrition for all times of the crop cycle, with an added boost of base level of micronutrients. Because 61.5% of the nitrogen is nitrates, this fertilizer is ideal for use in cold soils. Our Agrolution pHLow formulation is designed to be acidic, so it dissolves completely – even in hard water – making nutrients available to crops. It also reduces scale build-up and keeps irrigation systems clean. Delivering complete crop nutrition in a low-phosphorous formulation, Agrolution pHLow High NK 20-10-20 with micros helps growers produce stronger, better quality fruits and vegetables. Its ability to solve hard water issues makes it a convenient, easy-to-use solution.

Application rates

Max solubility	Potential Basicity	pH of 1% solution	pH of 5% solution
6.0 lbs./gal.	419 lbs. Calcium Carbonate/ton	2.89	2.58

Attention

Contact your ICL advisor for more detailed advice. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
