

ProSelect®

Cathrine

100% Festuca rubra trichophylla

Description

Your perfect choice for a hardy all-rounder This slender creeping red fescue is a great all-rounder. It's the perfect choice if you want quality turf for a fairway or a rough, a roadside or a recreational area. Also great on an incline. It's tolerant to shade, salt and to close mowing. Plus, it's resistant to red thread. Featured in our programs for low maintenance, salt and shade tolerance.

Benefits

- \\ Great all-rounder
- \\ Tolerant to shade, salt and close mowing
- \\ Highly resistant to red thread

How to use

Establishment and maintenance: For best results, seed at 20 – 30gr/m². It's best to keep the seedbed moist throughout germination and establishment. Germination should begin within 7 – 14 days with a minimum soil temperature of 12°. Full coverage in 6 – 8 weeks. Mow when it has reached a height of 5cm. Established turf maintenance: Looks especially good when fertilized annually with nitrogen at 10 – 15 gr/m². Water deeply and infrequently in absence of rainfall, or more lightly and frequently for overseeded turf. We recommend a cutting height of 7 – 25 mm or 5 – 8 cm in shade.
