## Description

Help your turf prepare for and recover from stressful conditions with Greenmaster<sup>®</sup> Liquid High K. Its low nitrogen and phosphorus levels keep growth low but the high potassium boosts your turf's health and resilience. It comes packed with full trace elements, which give your turf everything it needs to recover from the stress of the season. Lasts for up to 6 weeks.

Average recommended rate:

80 L/ha

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

### How to use

- 1 Apply from March to September, or through growing season.
- 2 Avoid applying in high temperatures and sunny conditions to optimize foliar uptake. Avoid applying during frosty conditions or drought.
- 3 Greenmaster® Liquid products can be tank-mixed with other ICL products, check tank mix table for compatibility.
- 4 Mix with Colour Pro spray pattern indicator to assist spraying and minimize spray drift
- 5 The water volume used to apply Greenmaster® Liquid products will affect how nutrients are taken up by the plant.
- 6 If you need more information, please contact your technical support.
