Description

Give your potassium-thirsty pot plants, bedding plants, and perennials all the support they need with Osmocote® 0-0-41. This fully coated fertilizer provides controlled potassium release over a pre-defined 5-6 month period for sustained growth. Use it with other Osmocote® products, such as Osmocote® Exact, for your other low phosphorus-demanding cultures.

Benefits

- \\ Fully coated granules
- \\ Use for phosphor reduction
- \\ Can be used with other Osmocote® products

How to use

- 1 The longevity of Osmocote is determined at 21°C. At lower average soil temperatures, the product will work longer at higher average soil temperatures shorter. Indicational: 16°C: 5-7M, 21°C: 5-6M, 26°C: 4-5M.
- 2 Partly used bags must be closed / sealed properly.
- 3 Store under dry and cool conditions.
- 4 If you need more information, please contact your technical support.

Application rates

Pot plants, bedding plants and perennials: 1-3 g/l Attention Rates are based on non-fertilized substrates. Please be aware that these recommended rates are general recommendations. Specific situations such as use in tunnels, greenhouses, or specific climate conditions require adjustments. We do not recommend this product for dibbling and/or autumn and winter potting. For more detailed advice, contact ICL Specialty Fertilizers. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilizers cannot be held responsible for any adverse results.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
