

Combifert®

Olive

 For olives to be proud of

20 | 5 | 10 | 30.0 | TE
N P₂O₅ K₂O SO₃

Description

Combifert® Olive was especially developed to be the perfect fertilizer for olive trees: it's proven to meet all their nutritional needs, particularly in tricky stages like bud-break. Its high sulfur content – 30% – helps to reduce the soil's pH level so the tree roots can reach phosphor and microelements more easily. It also provides boron – an element that's essential for olive trees – as well as NPK in a special blend just for this crop.

Guaranteed analysis

Oxide

N	Total Nitrogen	20%
	Ammoniacal nitrogen (N-NH ₄)	14.1%
	Urea nitrogen (N-Urea)	5.9%
P ₂ O ₅	Phosphorus Pentoxide	5%
	Water soluble (P ₂ O ₅)	4.7%

K ₂ O	Potassium Oxide	10%
	Water Soluble (K ₂ O)	10%
SO ₃	Sulphur trioxide	30%
	Water soluble (SO ₃)	30%
B	Boron	0.2%

Benefits

- \\ Specially formulated for olive trees
- \\ Easy to apply
- \\ High sulfur content plus boron to meet olive requirements

Application rates

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

- 1 We recommend applying Combifert® Olive between rows 15 to 20 days before bud-break to ensure the tree can access all the necessary nutrients during this period of high nutritional demand.
- 2 For more information or recommendations, please contact your nearest ICL distributor or the ICL advisor for your area.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
