Oxide		
N	Total Nitrogen	12%
	Nitrate nitrogen (N-NO3)	8.3%
	Ammoniacal nitrogen (N-NH4)	3.7%
P2O5	Phosphorus Pentoxide	0%
K2O	Potassium Oxide	0%
CaO	Calcium Oxide	9%
	Water soluble (CaO)	9%

Description

This liquid fertilizer makes it quick and simple to ensure your plants get the nutrients they require – just add it to your fertigation system with no need to dissolve first. This blend is the more calcium-rich of the two Fluical blends: it features 12% nitrogen for healthy growth and good color, plus 9% calcium oxide so you're guaranteed plants with strong cell walls and sturdy development. Nutri® Liquid Fluical 612 is easy on your wallet, it's safe, and you'll know your crops are getting exactly the right dose.

Benefits

- Nitrogen and calcium in liquid form
- Ideal for fertigation
- Safe, simple to use, good value

How to use

1. These formulations are designed for use in fertigation, particularly drip irrigation, and you can use them on all crops at any stage of their growth cycle.

2. Determine the dosage according to the specific characteristics of each crop and the conditions they are grown in, for example the type of soil or substrate, the quality of irrigation water, and the phenological stage of the crop or cultivar.

3. We therefore recommend that you consult your technical advisor to ensure the correct calculation and adjustment of the dosage.

4. For more information or recommendations, contact your nearest ICL distributor or representative for your area.

Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NNOV	DEC
