Guaranteed analysis

Oxide		
N	Total Nitrogen	15%
	Ammoniacal nitrogen (N-NH ₄)	9.1%
	Urea nitrogen (N-Urea)	5.9%
P ₂ O ₅	Phosphorus Pentoxide	5%
	Water soluble (P ₂ O ₅)	4.5%
K ₂ O	Potassium Oxide	20%
	Water Soluble (K ₂ O)	20%
MgO	Magnesium Oxide	2%
	Water soluble (MgO)	2.0%
SO ₃	Sulphur trioxide	25%
	Water soluble (SO ₃)	25%

Description

Combifert® Almond fertilizer has been specially adapted to the nutritional requirements of your almond trees. Contains copious amounts of sulfur and nitrogen – the vital building blocks for protein. It's also formulated with magnesium, the driver behind photosynthesis that helps deliver the carbohydrates that your trees crave. And it's easy to apply. Your almond trees will love you for it.

Benefits

- \\ Tailor-made for more efficient and balanced nutrition for your almond trees
- \\ Includes magnesium – vital for photosynthesis
- \\ High in nitrogen and sulfur

How to use

- 1 Apply Combifert® specialty fertilizer between rows 2 or 3 weeks before the start of bud-break.
- 2 To calculate the dosage, consider the nutrient content of the soil, which can be determined through a chemical analysis, as well as the nutrients that will be extracted by the crops based on their expected yield.
- 3 Store under dry conditions.
- 4 Properly seal partly used or damaged bags.
- 5 For more information or recommendations, please contact your ICL distributor or ICL advisor for your area.
