Description

Combifert® 9-23-30 is the double feature of crop fertilizers – brimming with potassium and phosphorus for exceptional growth in your vegetables, fruits, and extensive arable crops. The product also includes nitrogen and phosphorus for healthy development during the main stage of growth. You'll see the benefits reflected in healthy, strong and flourishing crops.

Benefits

- Very high potassium (30% K2O) and phosphorous content
- Easy to apply
- Tailor-made for more efficient nutrition

How to use

- 1 Apply evenly to the surface of the soil, close to the root system, and then scratch into the soil.
- 2 Alternatively, localize the application and bury the granules in rows close to the root system.
- 3 Store under dry conditions.
- 4 Properly seal partly used or damaged bags.
- 5 For more information or recommendations, please contact your ICL distributor or ICL advisor for your area.

Application rates

The average recommended application rate is 300 to 700 kg of fertilizer per hectare, depending on the type of crop and expected yield.

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
