

Agromaster®

30-7-13

Just one application for high yields

30 | 7 | 13
N P2O5 K2O

Guaranteed analysis

Oxide		
N	Total Nitrogen	30%
	Ammoniacal nitrogen (N-NH4)	2.6%
	Urea nitrogen (N-Urea)	27.4%
P2O5	Phosphorus Pentoxide	7%
	Water soluble (P2O5)	6%
K2O	Potassium Oxide	13%
	Water Soluble (K2O)	13%

Description

Agromaster® 30-7-13 | 4-5M is ideal for rice and other (sub)tropical crops. Just one application and you're done for the whole crop cycle, thanks to this blend with a whopping 70% coated nitrogen. Our innovative E-Max Release Technology means that you're always in control of the nutrients going to your plants regardless of the conditions. Your crops will benefit from intense but controlled growth, and the environmentally-compliant coated granules mean less nitrogen will leach away in the soil – Agromaster® simply goes further for your plants.

Benefits

- High nitrogen content to boost growth
- Higher or similar yields with only one application for the entire crop cycle of rice
- Improved nitrogen use efficiency (NUE) over conventional fertilizers

How to use

- 1 Apply by broadcasting before seeding/planting.
- 2 Incorporate Agromaster® in the soil between 5-10 cm depth.
- 3 Store under dry conditions.
- 4 Properly seal partly used or damaged bags.
- 5 If you need more information, please contact your technical support.

Application rates

Crop	Rate
Rice	400-600 kg/ha
Other crops, grown in (sub) tropical regions	400-800 kg/ha

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention
