## Guaranteed analysis

Oxide		
N	Total Nitrogen	1%
	Nitrate nitrogen (N-NO <sub>3</sub> )	1.3%
P <sub>2</sub> O <sub>5</sub>	Phosphorus Pentoxide	0%
K <sub>2</sub> O	Potassium Oxide	10%
	Water Soluble (K <sub>2</sub> O)	10.0%
SO <sub>3</sub>	Sulphur trioxide	6.5%
	Water soluble (SO <sub>3</sub> )	6.5%

## Description

Nutri Liquid Potassium 1.3-0-10+6.5SO<sub>3</sub> PCI is a low in chloride liquid fertilizer nourishes your crops with 10% potassium, as well as 1.3% nitrogen and 6.5% sulfur trioxide. With no added phosphorus, this formula is well suited to soils with an already high content of it. Potassium does wonders for root growth and helps make your plants resistant to drought. The high sulfur content, on the other hand, is vital for plant metabolism and forming plant proteins, amino acids, vitamins, and enzymes.

## Benefits

- \\ Generous potassium and sulfur content
- \\ Improves root growth and drought resistance, while reducing water loss and wilting
- \\ Accurate, safe, and homogeneous dosing – no need to dissolve first
- \\ Low in chloride

## How to use

- 1 These formulations are designed for use in fertigation, particularly drip irrigation, and you can use them on all crops at any stage of their growth cycle.
- 2 Determine the dosage according to the specific characteristics of each crop and the conditions they are grown in, for example the type of soil or substrate, the quality of irrigation water, and the phenological stage of the crop or cultivar.
- 3 For more information or recommendations, contact your nearest ICL distributor or representative for your area.
