Liquid**

Potassium 1.6-0-10+2.3SO<sub>3</sub> PCI BAC

Top up your crops with potassium, nitrogen, and sulfur

## Description

Our Nutri Liquid Potassium 1.6-0-10+2.3SO<sub>3</sub> LCI BAC liquid fertilizer feeds your crops with 10% potassium, but also comes with 2% nitrogen and 2.3% sulfur trioxide. There's no phosphorus in this formula – perfect for soils already rich in it. It's also low in chloride and acidity. Potassium works wonders for root growth and drought resistance, and the extra nitrogen and sulfur help keep your crops happy and healthy.

## Benefits

- \\ A punch of potassium, with added nitrogen and sulfur
- \\ Improves root growth and drought resistance, while reducing water loss and wilting
- \\ Accurate, safe, and homogeneous dosing – no need to dissolve first

## How to use

- 1 These formulations are designed for use in fertigation, particularly drip irrigation, and you can use them on all crops at any stage of their growth cycle.
- 2 Determine the dosage according to the specific characteristics of each crop and the conditions they are grown in, for example the type of soil or substrate, the quality of irrigation water, and the phenological stage of the crop or cultivar.
- 3 For more information or recommendations, contact your nearest ICL distributor or representative for your area.

## Application rates

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
