

NP

An excellent source of N and P for all crops and soils

Description

ICL's Granular Complex NP fertilizers are a range of premium, high-quality granular nitrogen and phosphate fertilizers with the addition of a large amount of sulfur. Each complex granule has the same composition of nutrients, ensuring consistent and uniform nutrient distribution in the field. We can supply tailor-made formulations of these NP fertilizers with additional magnesium and micronutrients to deliver superior yields, improved quality, and increased profitability for farmers.

Benefits

- \\ Source of nitrogen and phosphate for all crops and soil conditions
- \\ NP fertilizer with a large amount of sulfur
- \\ Suitable for chloride-sensitive crops
- \\ All nutrients available for plant uptake
- \\ Easy and uniform distribution in the field with all modern mechanical spreaders
- \\ Can be blended with potassium fertilizer to provide complete NPK nutrition

How to use

- 1 For direct application in fields, orchards and plantations or for bulk-blending with other fertilizers.
- 2 Compatible with urea and ammonium nitrate in blends.
- 3 If you need more information, please contact your technical support.

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention
