

NPK

NPK for total crop nutrition today

Description

ICL's premium Granular Complex NPK fertilizers supply the three primary macronutrients - nitrogen, phosphorus, and potassium - in every granule. Our NPK fertilizers are available in different formulations containing essential sulfur, magnesium, and calcium to provide balanced plant nutrition for healthy crop growth. With their consistent nutrient composition in each granule, these Granular Complex NPK fertilizers ensure uniform distribution of all nutrients across the field.

Benefits

- \\ Contains nitrogen, phosphorus, and potassium with all three macronutrients available for plant uptake
- \\ Available in tailor-made formulae with added magnesium, sulfur, and micronutrients
- \\ Easy and uniform distribution in the field with all modern mechanical spreaders
- \\ Good hardness ensures consistent handling, bulk blending, and field application
- \\ Deliver superior yields, improved quality, and increased profitability

How to use

- 1 For direct application in fields, orchards and plantations or for bulk-blending with other fertilizers.
- 2 If you need more information, please contact your technical support.

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
