

Granular Complex

PK High P

 The superior solution for soil low in phosphorus

Description

ICL's Granular Complex PK High P fertilizers are premium phosphorus and potassium fertilizers that are especially rich in phosphorus. Available in various formulations containing essential sulfur, magnesium, and calcium, these fertilizers provide the balanced nutrition required for healthy crop growth. Granular Complex PK fertilizers separate the application of phosphorus and potassium from the nitrogen application. This gives the flexibility to select the correct nitrogen source and dose to prevent nitrogen overdosing and unnecessary nitrogen leaching.

Representative Formulas

PK - HIGH P

	P₂O₅	K₂O	CaO	SO₃
27-18	27	18	18	8
28-20	28	20	17	5
31-13	31	13	20	8

Benefits

- PK fertilizers with a high phosphorus content to improve plant establishment Ideal for phosphorus-deficient soils
- Tailor-made formulae available with added magnesium, sulfur, and micronutrients
- Easy and uniform distribution in the field with all modern mechanical spreaders
- Good hardness ensures consistent handling, bulk blending, and field application
- Deliver superior yields, improved quality, and increased profitability

Application rates

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

- 1 For direct application in fields, orchards and plantations or for bulk-blending with other fertilizers. Compatible with urea and ammonium nitrate in blends.
- 2 If you need more information, please contact your technical support.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
